Admin login

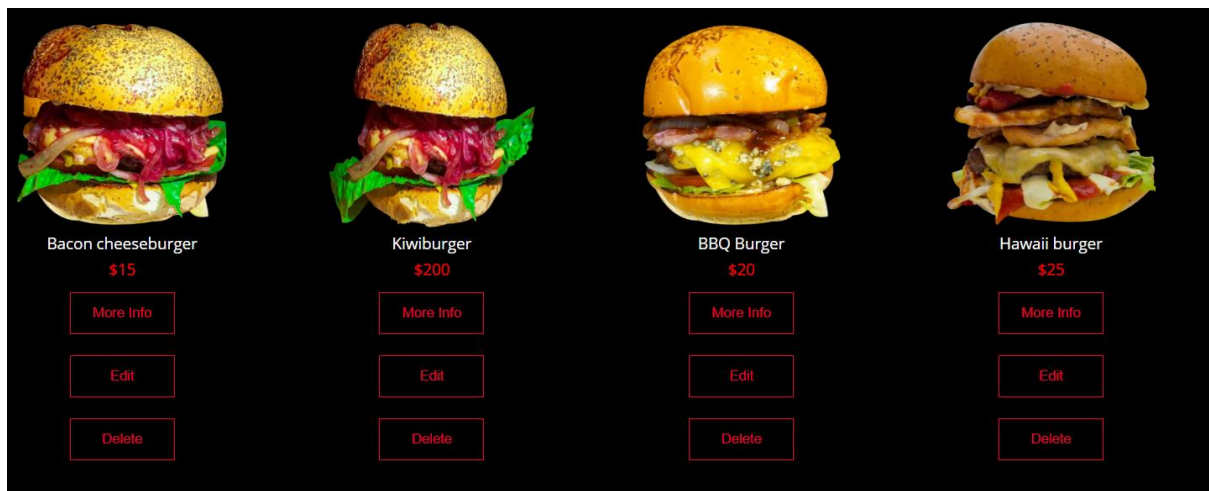

Username : admin

Password : adminadmin

After you login you can see **Open admin Panel** button by clicking on this button you can see side panel as follow.

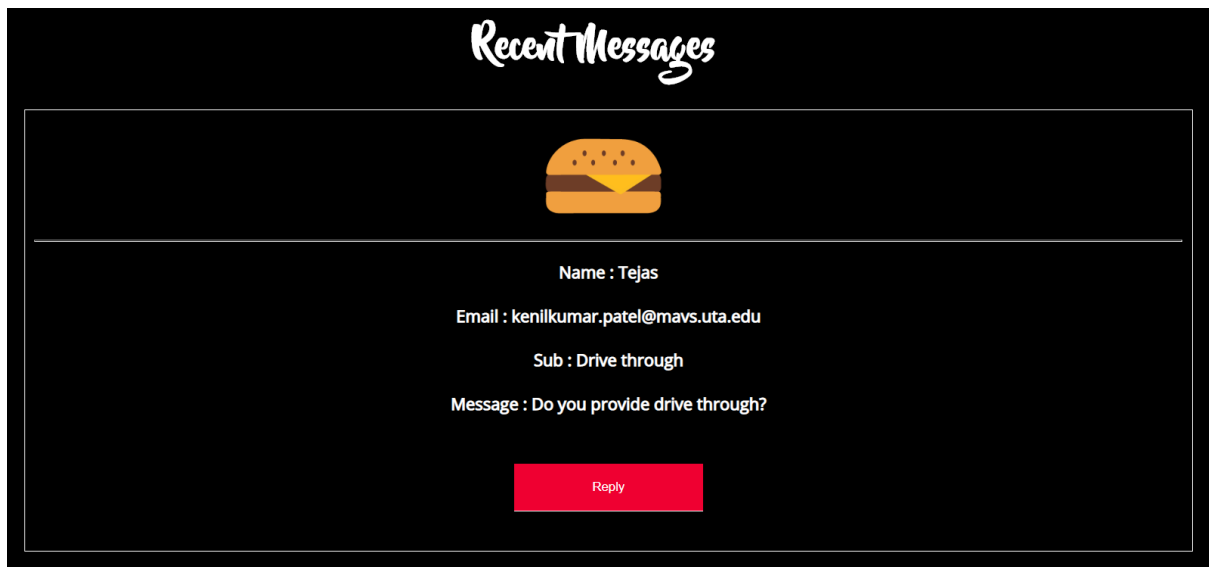

You can add, delete and change the data of burger.

The burgers showed on menu page are dynamically ordered as you order burgers in the database, we have a count of total burgers sold keep on updating so here burgers are ordered on the basis of popularity. Here in image this 4 burgers are top 4 popular burgers in our shop.

In the messages panel admin can see the messages user has sent through the contacto page as follow.

As you click on reply button you can see the panel to reply user as follow

A screenshot of a modal form for replying to a user. The modal has a white background and a black border. In the top left corner is a yellow burger icon, and in the top right corner is a black 'X' icon. The form contains three input fields: 'Customer Email:' with the value 'kenilkumar.patel@mavs.uta.edu', 'Subject:' with the value 'Drive through', and 'Message:' with the value 'Yes we have.'. At the bottom right of the modal is a red rectangular button with the word 'Reply' in white text.

As you hit reply button on this form reply will be sent to user to the mail he used during filling form in contacto page and that message will get marked as read in the database so only unread messages will get showed up in messages page.

Drive through
